

## ***Anatomy & Physiology Educational Classes***

***The United States Bowen Registry accepts this Anatomy & Physiology (A&P) program, customized for Bowenwork™ technique and taught by a Registered Bowenwork™ Instructor.***

### ***What classes are available?***

- *Scanlon Anatomy & Physiology (84 hrs)*
- *Tortora Anatomy & Physiology (164 hrs)*
- *Anatomy for Bowenwork (36 hrs)*
- *Muscles & Palpation of Surface Anatomy Seminar (16 hrs)*

***The Anatomy and Physiology courses are available online. In the course, the student will learn the organization and functions of the human body. In addition to the general text, supplements describing the relationship of each chapter to Bowenwork™ technique are provided to help the student focus on areas of particular importance to the technique. The Scanlon A&P course is an introductory collegiate course geared for those with minimal medical or science background. The Tortora A&P course is a more advanced level course for those who desire a deeper understanding of all the terms and medical conditions discussed in the Bowenwork manual. Individuals who have a strong background and enjoy an academic challenge will appreciate and benefit from this course.***

***The Anatomy for Bowenwork course is available online. The muscles and anatomy of specific regions where Bowenwork™ moves occur are studied in depth so that practitioners can improve performance of moves. The course will also help them understand what structures they are challenging and stimulating.***

***The Muscles & Palpation of Surface Anatomy Seminar is a two-day class. Brief lectures followed by opportunities for palpation and identification of bony landmarks and muscles pertinent to the Bowenwork™ procedures make this a unique learning opportunity. Ample time is available for students to practice and gain confidence in palpation. Class size will be limited to allow for individualized attention.***

### ***Who should take these classes and when?***

***The classes may be taken by anyone, at anytime, in any order, depending on the needs of an individual person. For a student with minimal anatomy background and palpation skills, the Seminar could be taken early in the module technique sequence. The sooner the student is exposed to muscles and gains confidence in palpating the body, the more information they can absorb during the technique modules. The Seminar is also a good review for those preparing for Module 7, or a certified practitioner wishing to enhance or review their anatomy knowledge and palpation skills.***

## **How can I meet the A&P requirement necessary for accreditation?**

Successful completion of two classes **plus** a passing grade of 75% or more on the comprehensive final exam fulfill the 100 hour anatomy and physiology requirement for accreditation as a Bowenwork™ Practitioner.

## **Yikes! A Comprehensive Exam?**

**The designation of “Accredited Bowenwork™ Practitioner” connotes quality and competence.** To assure this, a closed book, written comprehensive exam, covering the information of both classes, will be given in a proctored setting. This exam may be taken at the Seminar with the A&P instructor or, with an instructor at a time and location mutually agreed upon.

## **Pricing of Classes**

### **Anatomy & Physiology (A&P) – either Scanlon or Tortora**

Online \$275

(Above price does not include the general text, which is about \$120 for Tortora and \$40 for Scanlon)

### **Anatomy for Bowenwork**

Online \$110

**Muscles & Palpation of Surface Anatomy Seminar** \$325

### **Comprehensive Program Final**

No test fee if taken at the Seminar. If taken later, the student will pay a nominal fee to the Instructor for proctoring.

### **Extension Fee for Online Classes**

Each online class should be completed in 12 months or less. If additional time is needed, there is a small fee to maintain the student on the exam website. The fee is \$25 at this time.

All fees are subject to revision.
